Inspiration

A Vision That Became a Legacy.

Shri Narendra Aggarwal was a man of few words but great repute, inspiring young business minds across the nation. Known for his foresighted nature, philanthropy, and unique ability to turn ideas into reality, he received the 3rd position by the Apparel Export Promotion Council (AEPC), Government of India, in December 2017. Embracing the challenge to fundamentally shift organizational perspectives on human resources, he advocated for back-to-basics people empowerment and led from the heart. His rich experience, particularly in CSR engagements, played a crucial role in this transformation.

Under his leadership, the Shivalik Group thrived, earning a stellar reputation in the textile industry, both nationally and internationally, for high-quality products and timely deliveries. With the same vision of purpose-led growth, the Advitya Group also emerged as a renowned name in real estate development, recognised for well-planned projects and strong execution standards through landmark projects such as Aagman 1, Aagman 2, Aagman Plaza, Advitya Homes, and Advitya Plaza.

We proudly continued Shri Narendra Aggarwal Ji's legacy with Narendra Town Square, successfully delivered within 1 year and 2 months, setting new benchmarks in execution and efficiency. Carrying his vision forward, we are now developing Narendra Techno Park, an integrated industrial township in Tauru, along with DDJAY plots under the name Narendra Homes, further strengthening our commitment to sustainable infrastructure and planned development. His leadership continues to inspire a legacy of trust, responsibility, and long-term value creation.

Late Sh. Narendra Aggarwal

Tauru

Connected by Roads. Surrounded by Nature.

Tauru is steadily emerging as a practical industrial location within the Sohna region, offering cleaner surroundings, lower congestion, and improving connectivity. Set amid natural buffers and away from dense urban clusters, the area provides a healthier working and living environment. With growing infrastructure support and access to key road networks, Tauru is becoming suitable for organised industrial development alongside planned residential projects. This balanced setting makes it a sensible choice for long-term industrial growth and community-focused living.

Artistic Impressions

Future Ready

An Integrated Township for the Future.

Narendra Techno Park is a well-planned township bringing together industrial and residential plotting within a single, cohesive master plan. Spanning 39.6 acres, it offers organised infrastructure, clear zoning, and balanced surroundings, creating an environment where enterprise, daily living, and long-term value evolve together with purpose and clarity. Promoted by Advitya Group and Shivalik Print, the township reflects strong execution capability, planning discipline, and a long-term development vision.

Landmark

Well Connected. Naturally Clear.

Narendra Techno Park is a meticulously planned integrated township offering industrial and residential plotting within a unified master plan. Strategically located at Tauru Sohna, Haryana the project is developed in compliance with statutory norms and approvals, holding HRERA Registration No. HRERA-PKL-NUH-823-2026, Dated 07.01.2026 and License No. 174 of 18.09. 2025. A future-ready environment designed for structured growth and long-term value.

Infrastructure

Sizes That Support Every Scale.

Narendra Techno Park presents 69 systematically planned industrial plots, with plot areas ranging from 366.33 sq. yards to 6,341.83 sq. yards, accommodating a wide spectrum of industrial operations. The development is designed to support efficient circulation, smooth logistics, and long-term operational flexibility within a well-organised industrial setting.

Sustainability

Efficiency with Environmental Responsibility.

Sustainability at Narendra Techno Park is thoughtfully embedded into the overall planning. Provisions for rainwater management, landscaped green spaces, and energy-efficient lighting contribute to environmental balance and everyday comfort. Dedicated areas are also planned to accommodate solar installations, allowing flexibility for future energy needs while supporting responsible and efficient industrial development.

Planned Circulation

Engineered for Heavy Industrial Traffic.

The road network at Narendra Techno Park is designed for continuous industrial and heavy vehicle movement with safety as a priority. A 84 m wide main entry road and 18 m wide internal roads are built to strong quality standards, ensuring durability and smooth flow. Planned speed control, road breakers, convex mirrors, and safety measures support disciplined movement and secure day-to-day operations.

Artistic Impressions

Enterprises Hub

Serving Manufacturing, Trade, and Logistics.

Narendra Techno Park is planned as a versatile industrial environment suited to a wide range of business operations. The layout accommodates manufacturing units, trading activities, and logistics facilities through organised plotting, efficient circulation, and infrastructure designed for smooth day-to-day operations.

Connectivity

Fast Access Across Road, Rail, Air.

Narendra Techno Park is strategically positioned to offer easy and fast connectivity across major transportation networks. Its central location ensures smooth access by road, seamless freight movement by rail, and convenient reach to air routes, supporting efficient logistics and faster regional and national connectivity for industrial operations.

-  On the Sohna Bhiwadi Highway for Direct Road Access.
-  Dedicated Freight Corridor Rail Platform Delhi Mumbai.
-  10 minutes to Delhi-Mumbai Expressway.
-  30 minutes to Rajiv Chowk Gurgaon.

Site Map

Planned Spaces for Work and Living.

The master layout of Narendra Techno Park reflects a well-balanced integrated township with clearly defined zones for industry and living. The development offers 69 industrial plots and 251 residential plots, planned for efficient access, comfort, and organised growth. With controlled gated facilities and thoughtfully planned lifestyle amenities, the township creates a well-structured environment for both business and families.

Foundations

A Legacy of Trust and Excellence.

Since its inception in 1992, Shivalik Print has grown into a respected force in India's apparel manufacturing landscape. Backed by a workforce of over 17,000 professionals, the Group has built global capabilities across fabric knitting, processing, finishing, and garment production. With an annual turnover of \$250 million and exports of nearly 72 million pieces annually, Shivalik stands for scale, precision, and excellence.

Building on this legacy of execution and discipline, Advitya Group has established itself as a trusted real estate brand, delivering residential, commercial, and industrial developments in Faridabad. From Faridabad's trusted legacy to Gurgaon's new benchmark, the Group is now expanding its proven expertise into Gurugram, creating well-planned residential, commercial, and industrial spaces with the same commitment to quality and delivery.
